## Response to Amendment

1. This action is responsive to amendment A (paper #6) filed 5/27/04.

2. Based on applicants amendment and persuasive arguments, the art rejections and claim objections against claims 2-12, 14-15, 17-27, and 29-30 have been withdrawn.

Applicant's arguments regarding claims 13, and 28 have been fully considered but they are not persuasive. Applicant argues that Flom does not disclose sensing an object image in a first and second direction by moving an image sensing means to predetermined positions (page 24). However, Flom discloses an arrangement that can be used to obtain information about features of the iris using a single camera 180 (figure 10) provided to be moved between a plurality of positions in order to obtain three-dimensional information (col. 11 lines 13-19).

### Claim Objections

3. Claim 18-23 are objected to because of the following informalities: Claim 18 line 4 discloses, "and sending the object image". According to the specification this should read "and sensing the object image." Appropriate correction is required. Claims 18-23 would be allowable if the correction is made.

# Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 09/808,939

Art Unit: 2625

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 13 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flom et al. USPN 4,641,349.

Flom discloses a method and apparatus for the identification of physical characteristics of a human being or animal (col. 1 lines 5-10). The sytem includes a camera 180 (figure 10) to obtain an image of the iris and pupil and processor 190 that receives the image (col. 10 lines 15-28). Flom further discloses that one type of arrangement that can be used to extract features of the iris is with a single camera that can be moved between a plurality of positions in order to obtain three dimensional information (col. 11, lines 13-19). Flom further discloses that the iris is made up of many features that form a pattern such as pigment spots, crypts, etc (col. 3 lines 43-66). Thus, although Flom does not explicitly state that the camera is extracting X1 feature points, and X2 feature points from a different direction, it is obvious that if a camera is moved to different positions of the iris it will extract a different number of feature points depending on its location.

Claim 28 has similar limitations to claim 13, thus the same arguments used above apply equally to the rejection of claim 28.

# Allowable Subject Matter

6. Claims 2-12, 14-15, 17, and 24-27, and 29-30 are allowed.

Application/Control Number: 09/808,939

Art Unit: 2625

#### Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

#### **Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B Strege whose telephone number is (703) 305-8679. The examiner can normally be reached on Monday-Friday between the hours of 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on (703) 308-5246. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
